

SUNYAPONG PRABHAPUNPILAI

About me

I'm a civil engineer who has recently found an interest in computer programming. I recently started learning Java, and now I'm in love with it. I might currently be just a beginner in this field, but my familiarity with computer basics helps me learn things faster than others. Even though I've been studying by myself, it's surprisingly more effective than the traditional way of studying, where you put yourself in an obsolete educational system, sitting in the front of the class, and listening to lectures. Online self-studying is definitely for me. However, I can't say it doesn't have a downside, as it was tough when I had questions but had no one to talk with. Solving every problem by myself took so much time, but it was so rewarding after figuring it out. I've been learning Java for half a year now. I started with a Java introduction from BornToDev (Certified), then I found an amazing YouTube channel named Telusko, which became my main source of Java knowledge later on. AI chat is also useful when I have unusual questions about specific topics. I've been developing a website for some time now to recall what I've been learning so far, utilizing Core Java, Servlets, JSP, and JDBC. If you're interested in me, feel free to visit my website.

EDUCATION

2012 – 2017

Secondary School, High School
Potisarn Pittayakorn School,
Science – Math Program (English program)

2018 - 2022

Bachelor Degree
GPA : 3.33 (second-class honors)
Thammasat University,
Faculty of Engineering,
TEPE, Civil Engineering (International program)

TU-GET (PBT)

- Structure : 150
- Vocabulary : 180
- Reading : 450
- Total : 780

EXPERIENCE

Jun. 21 – Jul. 21

Site engineer (2-month internship) at SC ASSET

- Checked the correctness of the construction works on each phase of construction.
- Ensured that everyone followed the site safety policy.
- Got involved in the conversation between engineers and customers.

Nov. 22 – Apr. 24

Product Engineer at Asia Testing Equipment

- Verify products to be sold whether they meet TOR.
- Estimate project costs by calculations.
- Prepare quotations.
- Study and learn about civil equipment sold by the company.
- Assist customers to use the equipment safely and properly.
- Contact foreign manufacturer support.
- Be an interpreter between trainers from manufacturer companies and customers.
- Translate manuals from English to Thai.

PERSONAL INFO.

Age	24 yrs.
Date of Birth	Feb. 24, 2000
Gender	Male
Nationality	Thai
Driving license	Yes
Engineering License	Associate Engineer

SKILL

Languages

- Thai : Native proficiency
- English : Conversational proficiency

Programing Languages

- Java : Core Java, Servlet, JSP, JDBC
- SQL : Basic syntax and concepts
- Python : Basic syntax and concepts
- Matlab : Basic syntax and concepts

Personal Skills

- Be able to use computer seamlessly and interested in new technology.
- Familiar with computer.
- Speed typing test : 106 wpm

CONTACTS

Address : 159/69 PlaiBang Sub-district,
BangKrui, Nonthaburi 11130

Phone Number : 0860232448
